

Use of Personal Technology & Social Media

All Ridge Kids Playcare Educators are responsible for the safety and well-being of the children in our care. Personal technology devices may be used for emergency and program purposes, with Director/License Holder approval. iPads and walkie talkies are provided by the program, to ensure that the program app for parents can be updated regularly, children and Educators can be checked in/out and/or moved to other classrooms, as needed and communication is open between classrooms.

Personal technology devices should not be used to record photos or videos of children in program, unless Director/License Holder has approved and a plan created to ensure confidentiality of children in the program. Any photos or videos taken on personal devices should be uploaded to the parent app and/or social media, as needed, then deleted from the personal device.

To maintain the confidentiality of the children in our program, absolutely no personal posts on social media from within the program. You are welcome to share any posts made by the Ridge Kids Playcare social media accounts.
